Washington, D. C. 20405

Dear Sir,

Thank you for the opportunity to review two proposals to amend Subchapter F of the Federal Property Management Regulations (FPMR) which involve computer security. They were a new Subpart 101-35.3 which addresses the management of agency computer security programs and a revision to Subpart 101-36.7 which addresses environment and physical security of ADP facilities. My colleagues and I reviewed the proposals and we do not have any comments.

We are also reviewing two proposals to amend the Federal Procurement Regulations (FPR). The intent of one is to establish requirements when ADP acquisitions involve Government sensitive computer applications and the intent of the other to replace the current checklist requirement of FPMR Temporary Regulation E-42. Since a single Agency response on the FPR's is preferred by GSA, any comments I receive on the FPR's will be sent to our member of the Interagency Procurement Policy Committee (IPPC) for inclusion in a single Agency response.
